PHILADELPHIA CO.—Gas (natural and manufactured), electric company, trolley.

In June, 1901, details were made public giving the plan of merger of this company with the Consolidated Traction Co. and the Consolidated Gas Co. A new company is to be formed, with $10,500,000 common stock, $15,250,000 5 per cent cum pref. stock and $40,000,000 collateral trust 5 per cent bonds

EXCHANGE OF STOCK—Philadelphia Co. common stock will receive $100 in 5 p. c. col. trust bonds, $20 in pref stock and $20 in common stock for each $100 of stock held; Phila. Co. pref. stock will be exchanged, $ for $, for the col. trust bonds. Consolidated Gas pref. will get $120 in new preferred.—V. 72, p. 1081.

ORGANIZATION.—Originally a natural gas company, but in February, 1899, nearly all of its $7,500,000 stock having been purchased by a syndicate headed by Brown Brothers & Co., of New York, and Alexander Brown & Sons, of Baltimore, its operations were extended, as permitted by charter, to absorb the Consolidated Gas Co. of Pittsburg (artificial gas—see V. 66, p. 1188), the Chartiers Valley Gas Co. and the Allegheny County Light Co. (electricity). It has also acquired the entire capital stock of the Mansfield & Chartiers Gas Co., and in June, 1899, purchased a controlling interest in the Equitable Gas Co., both natural gas.—V. 69, p. 28. During August, 1899, it also acquired the entire capital stock of the Low Pressure Gas Co., which heretofore supplied the towns of Homestead and McKee's Rocks and the borough of Esplan, all adjacent to the City of Pittsburg. Pennsylvania Natural Gas stock was in Nov., 1899, taken in exchange for Philadelphia Co. stock at the rate of three shares of gas stock for one share of the stock of the Philadelphia Co. V. 69, p. 1015. In Oct., 1899, it also acquired the entire capital stock of the Union Gas Co. of McKeesport, which supplies the towns of McKeesport and Reynoldton. On May 1, 1901, acquired the entire capital stock of the Braddock Gas & Light Co., which supplies the town of Braddock with manufactured gas.

In accordance with an offer previously made (see V. 68, p. 479), the Philadelphia Company in October, 1899, began exchanging its stock for that of the United Traction Co., street railway system, below described—V 69, p. 744; and has acquired 338,955 shares of the common stock of that company.

ABBREVIATIONS, ETC.

The terms and abbreviations employed in this SUPPLEMENT are explained in the following :

"STOCK & BONDS"—Under these words are shown—

"STOCK"—The amount of stock *authorized* immediately follows the word "stock", and against this is the par value of single shares, viz.: "Stock, $200,000—$100", means stock, total issue authorized by charter or by act of legislature, $200,000, divided into shares of $100 each; "f. p." following the amount given as outstanding means "full paid."

"Pref." means "preferred stock." "Pref. 6 p. c. cum." means preferred stock entitled to dividends of 6 per cent per annum, such dividends if not paid accumulating, all dividends due and unpaid to be paid in full for each and every year before the common stock receives anything "Pref. 6 p. c. *non*-cum." means simply that the stock is entitled to 6 per cent per annum if earned, but that if unearned in any year the dividend for that year will not be paid subsequently.

"BONDS"—"Mort." or "M." means mortgage. "Consol." or "con. M." means consolidated mortgage. "Gen. M." means general mortgage. The amount next following is the total authorized amount that can be issued under the mortgage. The word "gold" is usually spelled out, but in some instances is contracted to "g," while "cur." means currency.

"Conv." means convertible into stock. "S. f." means sinking fund. "c." means coupon; "c.*" means coupon but may be registered as to principal; and "c.*&r." means that registered certificates without coupons as well as coupon bonds are outstanding. The letters "p. m." mean per mile, so $15,000 p. m. means that the issue of bonds is restricted to $15,000 for each mile of track. "Guar." means guaranteed, and "guar. p. & i. (end.)" means guaranteed as to principal and interest, the guaranty being endorsed on each bond.

"DATE"—The date of issue on the face of the bonds is indicated under the word "date."

"INTEREST"—Under this heading is given the rate per cent yearly of the interest payable on the bonds or (if guaranteed) of the dividend payable on the stock; also the months when the interest or dividend is payable, thus, "6 J - J" means 6 per cent per annum payable January and July; correspondingly, "F - A" is used to mean February and August; "M - S" means March and September, and so on, while "Q - J" means quarterly beginning in January and "Q - F" quarterly beginning in February. [The day when the interest payment is due can generally be determined by noticing when the loans mature, the day of the month there given being in most cases the same as for one of the interest dates.]

"ROAD"—The word "track" means in Street Railway parlance all track, whether main line, siding, switch or second track. "Rails are 80-lb. girder" means that each rail weighs 80 pounds to the yard.

SHALL TWO- OR FOUR-MOTOR CARS BE ADOPTED?

In the comparison of the power consumption of two- and four-motor cars, there are two factors which need to be given due consideration. First, comparisons are frequently made between two motors of the same size (as two of the General Electric Company's G-E 67's and four G E 67's) instead of using four motors having a total horse-power equal to that of the two motors. This is manifestly unfair, since the two motors are nearly always heavily loaded and they are, therefore, working with maximum efficiency, so that the losses per motor are reduced to a minimum. The four motors, however, are not loaded so heavily and consequently do not work as efficiently. This fact was illustrated during experiments conducted by the Lynn & Boston (Massachusetts) Railroad Company. The comparison of the power consumption of box cars having two G E-58 motors and four G-E-58 motors showed an increase of 24 per cent in power consumed by the four-motor cars over that consumed by the two-motor cars, while a comparison of two G-E 57 motors (52 horse-power each) and four G-E-1000 motors (37 horse-power each) gave but little difference in power consumption. Second, effort should be made to eradicate from the result the personal equation of the operator by having the same motorman run the cars after he has become used to running each one over the route selected for trial.

The selection of the motor to be used requires a separate solution for each particular case. In city service, where stops are frequent and a high speed not allowable, two-motor cars might be the best to use, and the Boston (Mass.) Elevated Railway Company so considers it in their case. Interurban traffic, requiring higher speed and greater tractive power, might require the four-motor car with its greater available horse-power. The tractive power of a car depends upon the adhesion between the wheels and rails and the weight carried on the driving wheels. The adhesion between the wheels and rails is supposed to be due to the interlocking of minute irregularities on their surfaces. In the case of two-motor cars, with both motors on one truck, only a part of the weight can be carried on the driving wheels and this percentage of the total weight decreases as the car becomes loaded. With a four-motor car the whole of the weight is carried by the driving wheels, whether the car be loaded or empty. This is very much to the advantage of the four motor car when the road has steep grades, or the rails are slippery or are blocked by snow and ice. Then, again, the four-motor cars accelerate faster and acquire a greater speed with a lower temperature of the motor, insuring longer life to it. In tests made by the Lynn & Boston Railroad Company with a two-motor equipment, the temperature of 212 deg. Fahrenheit—beyond which temperature the insulation is rapidly destroyed—was passed after about seven hours on a day when the outside temperature was only 43 deg. Fahrenheit, a rise of 169 deg. in temperature, while the four-motor equipment, after running eleven hours, only reached a temperature of 151 Fahrenheit, a rise of 108 deg. It was found that the hottest place in the motor was between the top field and the brush holder yoke. From their tests the engineers of the company estimated the deterioration of the windings of the motors to be about as six to one in favor of the four-motor equipment. The tests showed that the two-motor equipments required about five per cent less speed than the four-motor equipments, and since the former will be oftener in the repair shops, due to the more rapid deterioration of the motor windings, it was considered that they will make at least ten per

cent less mileage. Since part of the loss of mileage will probably be caused by failure of the electrical apparatus during operation on the line, there will be more frequent delays, causing loss of mileage by other cars with the expense occasioned thereby. "When one car makes less mileage in a given time than another, the expense of labor for operation is increased, the earning capacity decreased, and more cars are required to do the work."

Every railway engineer and manager is ever on the alert to keep the power consumption at the minimum consistent with efficient service, and thus secure the most economical operation of his railroad. Nevertheless, it is probable that in the future four-motor cars will be used for inter-urban service at the expense of a somewhat greater cost for fuel consumption. By this means greater power may be obtained to insure fast and uniform movement of heavily-loaded cars over long and difficult grades against snow and ice.

THE GANZ SYSTEM.

The selection of motive power for heavy street railway traffic presents problems which require the broadest information and the most mature judgment. At present the kind of power to use is quite generally decided in favor of electricity. This method of conveying energy being adopted, there is still the important query, How shall it be distributed from the generator to the motor? The solution of this problem for the largest equipment in this country has been to generate the electrical current at a central power station by three-phase alternators and to distribute it from that point at about 11,000 volts to sub stations. In these stations rotary converters receive the current at 390 volts from step-down transformers and send direct current at 625 volts to a third-rail conductor. The advertisement for bids for equipping the Metropolitan and District railways of London brought forward a proposal for a different system, which would be very much cheaper to establish and less expensive to operate. The use of rotary converters has worked very satisfactorily and effectively in this country. In London, however, the imposed condition that there should be a very small drop in the return circuit would lead to so great a multiplication of sub stations as to very materially increase the cost.

The system proposed by Ganz & Company, of Buda pest, Hungary, for the London railroad was not considered feasible by the English and American engineers, and they did not put in a tender on that basis. In brief, the Hungarian engineers propose to install a high-tension three-phase system. The installation contemplated would follow in general that of the Italian railway, to which reference is made later. Many modifications would, however, be necessary to adopt the construction used on a line of moderate traffic to one having very heavy traffic, and also to profit by the results of later experience.

Ganz & Company did not propose the above system without much study and experiment having been expended on the subject by both themselves and other engineers. The Swiss Government appointed recently a commission of three prominent electrical engineers to make investigations in regard to the safety of passengers during transit on systems using high voltages. This commission, composed of Gisbert Kopp, Professor Weber and Professor Thompson, rendered independent opinions, with the result that the employment of high voltages for railway purposes was unanimously declared to be safe. To secure this safety with the high-tension currents, however, great care must be exercised in the track construction and the careful execution of all details. It is recommended by other engineers "that the high-tension conductors in the cars should be surrounded by an insulated tube, and also by a continuous closed metal tube, which is a good conductor, and which should be metallically connected at several points with the car truck, and in this way directly with the rails. This safety precaution should be further extended to all metallic apparatus in the car, especially the roof of the same, the metal covering of which should be metallically connected with the ground. Furthermore, the apparatus in the car should be so arranged that the high-tension apparatus is but little handled; in fact, only when it is necessary to cut in the motor, and even for this operation a special device has been provided which excludes all danger."

Several high-tension three-phase systems have been installed in Europe. Perhaps the largest aud most noteworthy is the Lecco, Sondrio & Chiavenna Railway, which is now being constructed in northern Italy. The road is 66 miles long, with a maximum grade of 2·2 per cent. Plans are made to obtain about 7,400 horse-power from a waterfall with facilities to furnish more when needed. The three-phase current generated at 20,000 volts is sent through the main line to twelve sub-stations, where it is transformed to 3,000 volts and supplied to twelve independent sections of the railway line, each section being supplied with fuses. Two overhead trolley wires represent two of the phases, with the track for the third. The controller handle has but two positions—full speed and half speed. The schedule speed is about 37½ miles (full speed) on the level and about 19 miles on grades. * * * The construction of the Jungfrau, Switzerland, three-phase railway was commenced in 1897 and it is expected that it will be completed in 1908 or 1910. The three-phase current is generated by water-power at 7,000 volts and transformed to 500 volts. Two overhead trolley wires and the rails represent the three phases. Estimates based on manufacturers' actual prices showed that the first cost for installation of the rotary converter method would be over 50 per cent greater than the method adopted by which only three-phase currents are used. * * * An experimental line has been in operation between Grosse Lichterfelde and Zeblendorf. In this case three wires were placed beside the road to avoid the effect produced upon the telephone system when the track was used as one conductor. "The controller drum is mechanically connected by a chain gear with the starting devices for the rotating parts of the motors. When running with 750 volts the controller is directly connected with the trolleys. When running with 10,000 volts it is, however, connected through the transformer from 10,000 volts to 750 volts, and a switch for 10,000 volts. Running with 2,000 volts the supply conductors to the primary part of the motor can be cut off from the controller and the car operated by two auxiliary switches and without the use of the transformer."

Although it is now probable that, owing to the energetic efforts of an American financier, the London Board of Trade will not approve the application o

the Ganz system to the Metropolitan railway, the fact that the directors of the railway voted to adopt the system will afford ample food for thought. Accustomed as they have become to offer a satisfactory article in the quickest time and at the lowest figures, the advent of a foreign concern with something new at a lower price should at least put them on their guard. However, there is also a bright side to these trials of the three-phase system which are being made in Europe. The money and brains necessary for the development of the applications of electricity, in common with many other things, have been very largely furnished in this country, and those abroad have had the opportunity to profit by the successes and failures in these experiments. Now the tables are turned. If the American engineers will put themselves in the proper attitude—willing to accept the new, if it be better, and discard the old—they may be able to profit very largely at another's expense. It may transpire in due time that high-tension three-phase electric systems are not adapted to general but to special application.

IMPRESSIONS BY THE WAY.

Each city or town has its peculiar characteristics, but few are brought more into prominence than those of its street-car service, and these salient peculiarities are remembered and identified with the city by the casual visitor long after other impressions have passed away. One such distinguishing feature is furnished by a city in the central part of Massachusetts, where some of the electric cars are heated during the cold weather by stoves. As the traveler waits for an approaching car with its trail of smoke, memory carries him back to the days of the slow and bobbing horse-cars. Memory's retrospect is heightened as he enters and, shivering, takes a seat at a distance from the stove. Further food for meditation is furnished as the car is halted while the conductor goes to the car-barn in search of a pan of coal with which to replenish the struggling fire.

The thought of horse-cars brings before the mind several cities which still have short horse-car lines, or have but recently given them up. This tenacious clinging to the inferior because it is established and has become a part of the environment shows in one case a conservative attitude, an unwillingness to change the accustomed methods and traditions, and in other cases a failure to act, to discard that which is obsolete for that which is new and effective. As one reflects on the strange, incongruous appearance of horse-cars, the thought is thrust home—How transient are the works of man before the march of science and its myriad applications! There are those yet in the prime of life who can remember with what feeling of pride the residents of New York City regarded their early, scanty horse-car service, and one need not count very many years to recall the period when electric street cars came into general use.

Nor are all the noteworthy characteristics confined to the States. The conductors on the street cars of one of the principal Canadian cities approach the passengers with a hand-box, which may be taken by the uninitiated stranger for a camera or an infernal machine, and holds it directly in front of them. The hero's fears are, however, quieted as he sees his neighbor drop a nickel or a ticket into the mysterious box. One notices, also, the very prevalent use of tickets by the patrons of the railway.

In Southern Wisconsin the electric-car traveler, hearing the sound of a bicycle whistle, looks for the scorching wheelman, but as no wheelman is in sight and the car begins to move it becomes evident that the conductor has thus signaled the motor-man to start, and has thereby saved himself the trouble of reaching for the bell-rope. On the street railway of one of the principal cities of this section of the country, when within about one mile of the terminus of the line the stranger turns to signal the conductor, there is no conductor to be seen. Information is then given that the conductor changed to an in-going car at a turn-out a half mile or so back, and that one must act as conductor pro tempore. Thus, the car travels from the turn-out to the terminus and back again before it makes connections with the conductor and his starting whistle.

A city in Northern Illinois furnishes surprise by the length of its surface cable trains. The trains have been composed of a grip-car and three trailers, which extend half-way from one street intersection to the next, and were responsible for much congestion of traffic. In deference to the public demands for shorter trains, "the trains are to be limited to a grip-car and two trailers." This move is gratifying to the patrons of the road and the users of the street. It would be greatly appreciated by them if the trains contained but one trailer and ran oftener. This would give quicker moving trains, which would stop with the rear car in closer proximity to the cross-walk, and would cause less inconvenience to the street traffic.

One feature is possessed in common by nearly all the street railways. This is the absence of adequate methods for lighting street car signs at night. By reason of such deficiency much annoyance is given to patrons of the roads, and partial stopping of the cars is necessary that the would-be passenger may read the sign to determine whether the approaching car is the one which he wishes to take. The prevailing lack of proper illumination for the car signs is surprising, since the defect may be remedied so easily. One street railway solves the problem effectively by placing incandescent electric lamps on the car roof in front of and below the sign. These lamps have reflectors as in footlights. Mr. F. J. L. Henderson, the Superintendent of the Newton Street Railway, of Newton, Massachusetts, has invented a device which is described in the "Street Railway Journal as follows: "Two vertical standards or posts are attached in the usual positions on the car roof, each with a base adapted to its slope. Projecting forward from a T midway on each standard is a short arm of gas-pipe running to a bend or elbow, attached to which is a vertical pipe running to still another T, with horizontal pipe attached, all properly threaded and connected. At the end of this latter is attached a socket for an Edison lamp. On the horizontal pipe is a cup-casting or head, attached thereto by a set-screw and shaped so as to act as holder for a reflector or shade. This reflector extends above and just in front of the revolving sign, and throws the light downward upon that part of the sign which is exposed to view. Four 125-volt Edison lamps are used in connection with the signs. They are connected in series, and two are placed at each end of the car.

The illuminating structure does not in any way interfere with the ordinary manipulation of the sign by the use of a stick or pole, and as the trolley rope lies smoothly over the rounded surface it meets with no obstruction. The structure is sightly in appearance and the reflector protects the sign from being smudged by the trolley-wheel grease. The light thrown from this device serves also the purpose of a second headlight and facilitates the running of cars in dark places."

THE MERIT SYSTEM OF THE TERRE HAUTE ELECTRIC COMPANY.

The merit system adopted by the Terre Haute Electric Company of Terre Haute, Indiana, to control in the discipline of its employes by individual records without suspension, is a very admirable system. It has met the approval of the employes, who believe that they will be able to render the company more efficient service and at the same time secure more satisfactory conditions for themselves. The General Manager of the company says that it is working very nicely.

Our country is but the enlargement of the family through the City and State, and it is through comfort, thrift and moral health in the family that the safety and prosperity of the nation can be assured. A very important condition in securing these qualities is that each of the different members of society should have some regular, remunerative occupation. When one knows that his position is secure so long as he conscientiously performs his duty, and that if he meets with a mishap he will not have idleness, with its attendant hardships and financial set-back in his home life, forced upon him, but that he will be given an opportunity by alertness and zealousness to offset this debit entry on his account by a credit entry, then, indeed does he have courage to effectively perform his duty in the full faith that such a course will in the long run work to his advantage. Further, he not only knows that he has this standing account, but he can consult it to see just what his record is, and what are his chances for advancement, since it will be the policy of the company "to make promotion from the ranks whenever possible." In abandoning the custom of suspending its employes for minor infractions of its rules, the company has removed the source of much ill-feeling which at different times has been manifested against street railway companies by its employes. It is to be expected that more harmonious relations will exist between employers and employes, and that the service rendered by the latter will be very much more careful and spontaneous under the Merit System. One vital point in the system is that the individual record must be kept with keen judgment and absolute impartiality.

The first order issued by Supt. M. F. Burke putting the system in force is as follows:

ALL MOTORMEN AND CONDUCTORS.

TERRE HAUTE ELECTRIC COMPANY, TERRE HAUTE, INDIANA.

Effective January 1, 1901.

The system of discipline of employes without suspension, by record and bulletins, will be adopted. The object of this method is:

(1) To secure a higher state of efficiency. Strict discipline is essential to successful operation. No continuous service performed by man can be perfect, but a high state of discipline, and a careful selection of men, will naturally produce a better class of service and results.

(2) To avoid loss of time and earnings of employes.

(3) To judge each case of an erring employe on its merits, with regard to his previous record and his probable future availability.

(4) To stimulate employes to co-operate with the company, which is to their mutual advantage.

(5) To inspire and develop in all employes a feeling of security and confidence that faithful service will be appreci ated and rewarded by their uninterrupted attention to duty, and also that those who are habitually careless and indifferent to the company's, as well as their own, interests, will be dropped from the rolls.

* * * * * * * *

(7) Such acts as disloyalty, dishonesty, desertion from duty, intemperance, insubordination, wilful neglect, gross carelessness, immorality, violation of rules whereby the company's property is endangered or destroyed, making false reports or statements concerning matter under investigation, etc., will, as heretofore, subject the offender to summary dismissal.

(8) We want more ounces of prevention and less pounds of cure; motormen to avoid accidents; street cars promptly on time when signaled, more harmonious, painstaking endeavor; conductors to be polite to all, being exacting and careful in observing passengers that are on connecting cars or street, and who desire to take cars.

The following bulletin has since been issued:

TO TRAINMEN.

The following system of discipline will be put in effect, beginning May 2:

A *Rec rd* will be kept of each trainman at the Manager's Office. Each man will be allowed to examine his own record at any time, but not the record of anyone else.

Entries will be made against a man for all infractions of rules, etc.

Entries will also be made in his favor in case of all commendab'e actions on his part.

No entries will be made against a man without a written notice being served him. He will also be allowed a hearing before the Manager and Superintendent.

The system of seniority will be adopt-d, and men will be allowed choice of runs according to their seniority, unless there are special reasons against this rule—such as a man's unfitness for a certain run, etc.

In disciplining an employe, his previous record will be considered.

The system of laying off, or reducing trainmen to the Extra List, will be discontinued. Seniority lists showing present standing of men will be posted and adopted for the future.

It will be the policy of the Company to make promotion from the ranks—whenever possible.

In case of consolidation, trainmen of other companies will be pl ced on list according to their seniority.

In case of reduction to the ranks of any man who has been promoted from the ranks, he will retain his seniority, unless his reduction has been a punishment.

STREET RAILWAYS.

SECURITIES AND REPORTS.

This is one of our four SUPPLEMENTS. In using the series it is to be remembered that they are inter-dependent publications, complete only as a whole. If utilized together, and with the fresh items of news the CHRONICLE contains from week to week, the investor will have all the information he needs in seeking a safe and remunerative lodgment for his money.

Street Railways forcibly illustrate this inter-dependence. Such roads obviously rely for their income, and therefore in great part for the value of their securities, upon the population and activity of the country they serve. Hence constant reference to our STATE AND CITY SUPPLEMENT will be found necessary by those wishing to purchase the stocks and bonds of street roads. Population, assessed valuation, tax rate, total debts of the counties, cities and minor municipalities are given at length in that publication, every one of which items is an essential fact contributing more or less to any correct estimate of the amount of suburban travel a given road commands.

The ABBREVIATIONS used in our Street Railway statements will be found explained in a table immediately following the last statement in this SUPPLEMENT.

A full INDEX which shows where each railway will be found is also given on the closing pages.

ATLANTA RAPID TRANSIT.—An electric road.

ORGANIZATION—Formerly the Collins Park & Belt RR. On June 11, 1901, had completed 38 3/10 miles of track, of which 34 3/10 miles was being operated; has franchises over the principal streets of Atlanta, and also extends to all the summer resorts. Track is laid with 90-lb. girder rails; 45 cars of the newest design received. In 1900 purchased at receiver's sale the Atlanta Electric Ry., a suburban line, running to Lakewood, which has been thoroughly reconstructed. In June, 1901, was constructing an extension to Grant Park, a summer resort, which will be completed by July 1, 1901. Several other extensions are proposed. The company recently paid the city $50,000 for the privilege of a franchise over the viaduct which is being built over the steam railroad tracks, thus enabling it to run through cars across town.

Constitutes an opposition line to the old roads controlled by the Atlanta Railway & Power. Litigation to prevent condemnation of tracks of the latter delayed construction for a time. Franchise provides that in case of consolidation with another road both companies are to pay 5 per cent of gross receipts to city. Also that company cannot be subjected to any tax on gross receipts until the Atlanta Ry. & Power Co. can be compelled to pay the same tax. In June, 1900, Rapid Transit Co. began selling 3 tickets for 10 cents.

MASSACHUSETTS ELECTRIC COMPANIES.—(*See Maps Pages 14 and 15.*) Electric light and street railways.

ORGANIZATION—Formed in May, 1899. Is not an incorporated company, but a voluntary association managed by a board of fifteen trustees, who hold the title to its assets. Messrs. E. Rollins Morse & Bro. and Tucker, Anthony & Co. of Boston, who promoted the combination, in June, 1899, in offering some of the stock for public subscription [$1,000 of preferred and $500 common was offered for $1,050], stated that "the Declaration of Trust contains strict provisions against the creation of any indebtedness whereby any shareholder or trustee can be held to any personal liability." The following is a list of the companies originally controlled, also including those since added. For details regarding their earnings and condition, see statements below. Most of these separate companies have since ceased to exist, having been amalgamated with others in accordance with the plan of the management to combine the various properties into a few large companies. Roads already merged are designated by an asterisk (*) prefixed to the name.

The foregoing comprise electric street railway lines in Eastern Massachusetts and Rhode Island. The companies given cover the greater part of the street railway mileage north of Boston as far as Nashua, N. H., and Newburyport and Gloucester, Mass., and south as far as Fall River, Mass., and Newport and Providence, R. I., connecting directly with the street railway system of Boston. Various electric lighting companies doing business in the same section are also included. In November, 1900, the trustees held 104,259 of the 114,374 outstanding shares of stock of the companies above enumerated.

The intention is to have only two operating companies—one to consist of the lines north of Boston, comprising the roads in the Lynn & Boston system, and to be called the Boston & Northern, and the other consisting of the lines south of Boston, comprising the roads in the Old Colony Street Ry. system formerly the Brockton Street Ry.

STOCK & BONDS.—The share capital is represented by certificates of participation, which give the owners a proportionate interest in the shares held by the trustees. Both classes of shares are reported exempt from taxation in Massachusetts. The following shows stock outstanding after absorption of South Shore & Boston and Lowell & Suburban. The stock was listed on the Boston Stock Exchange in April, 1901.

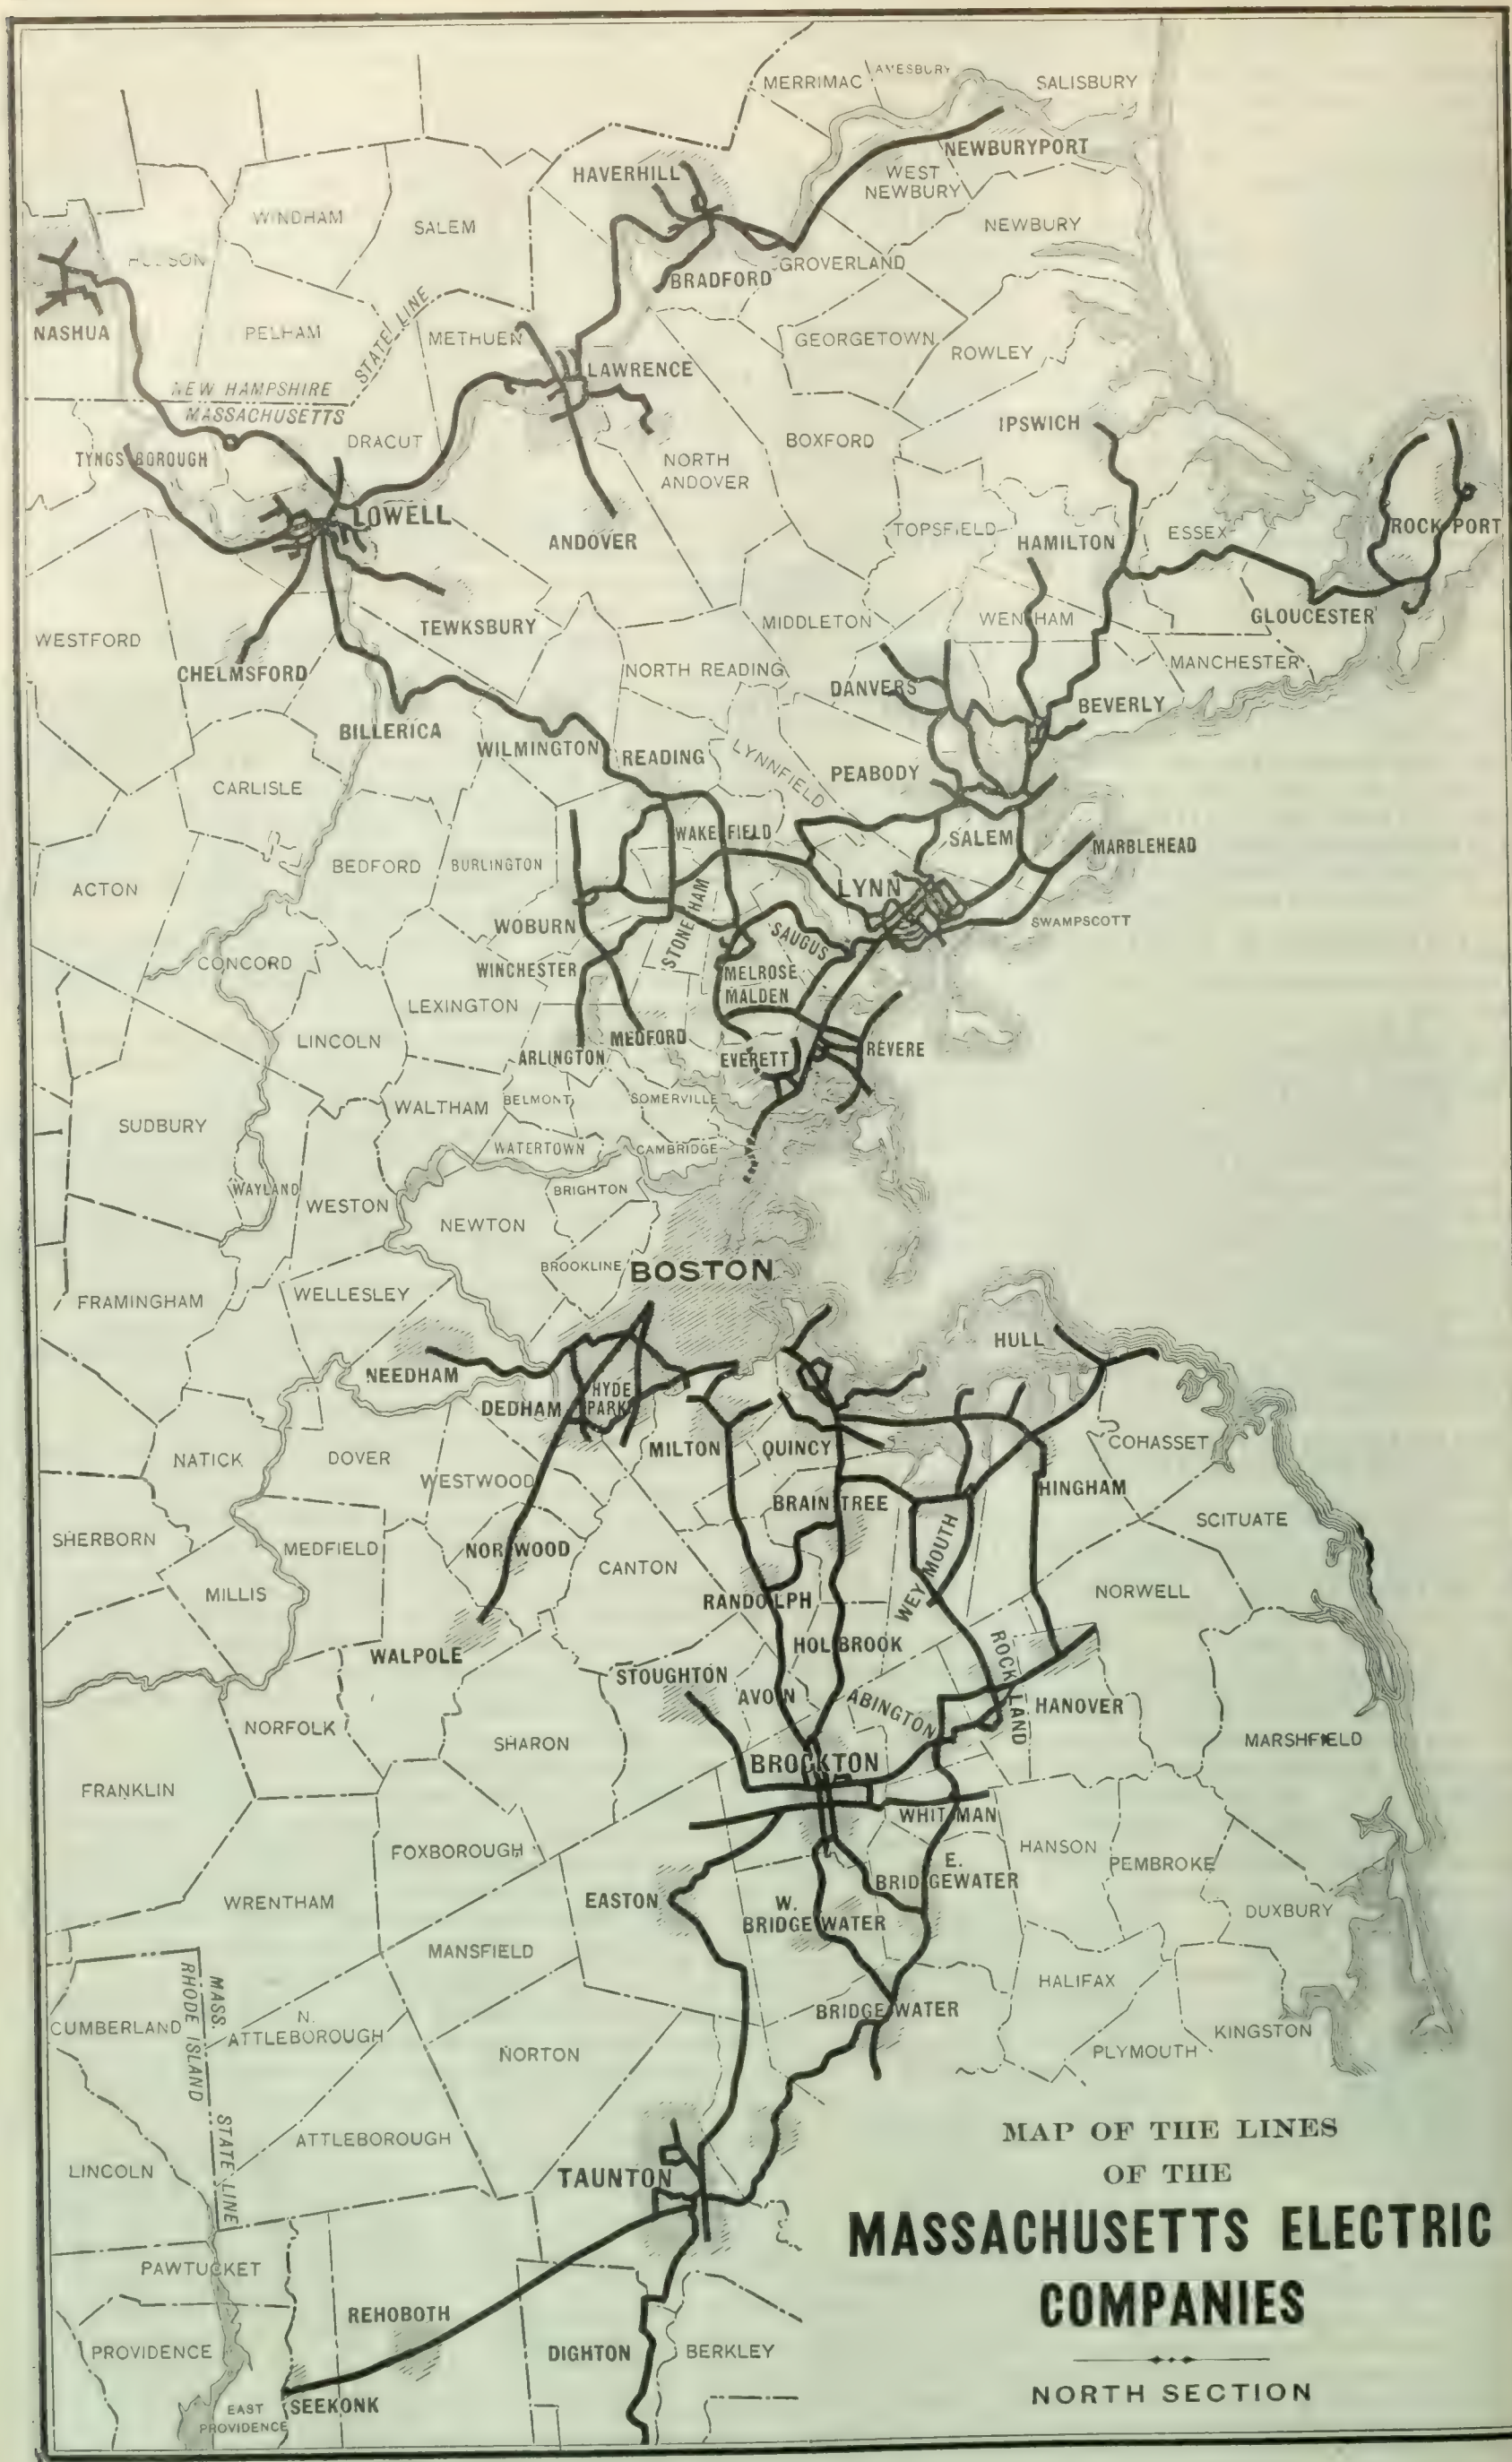
Companies Controlled by Massachusetts Electric Companies.

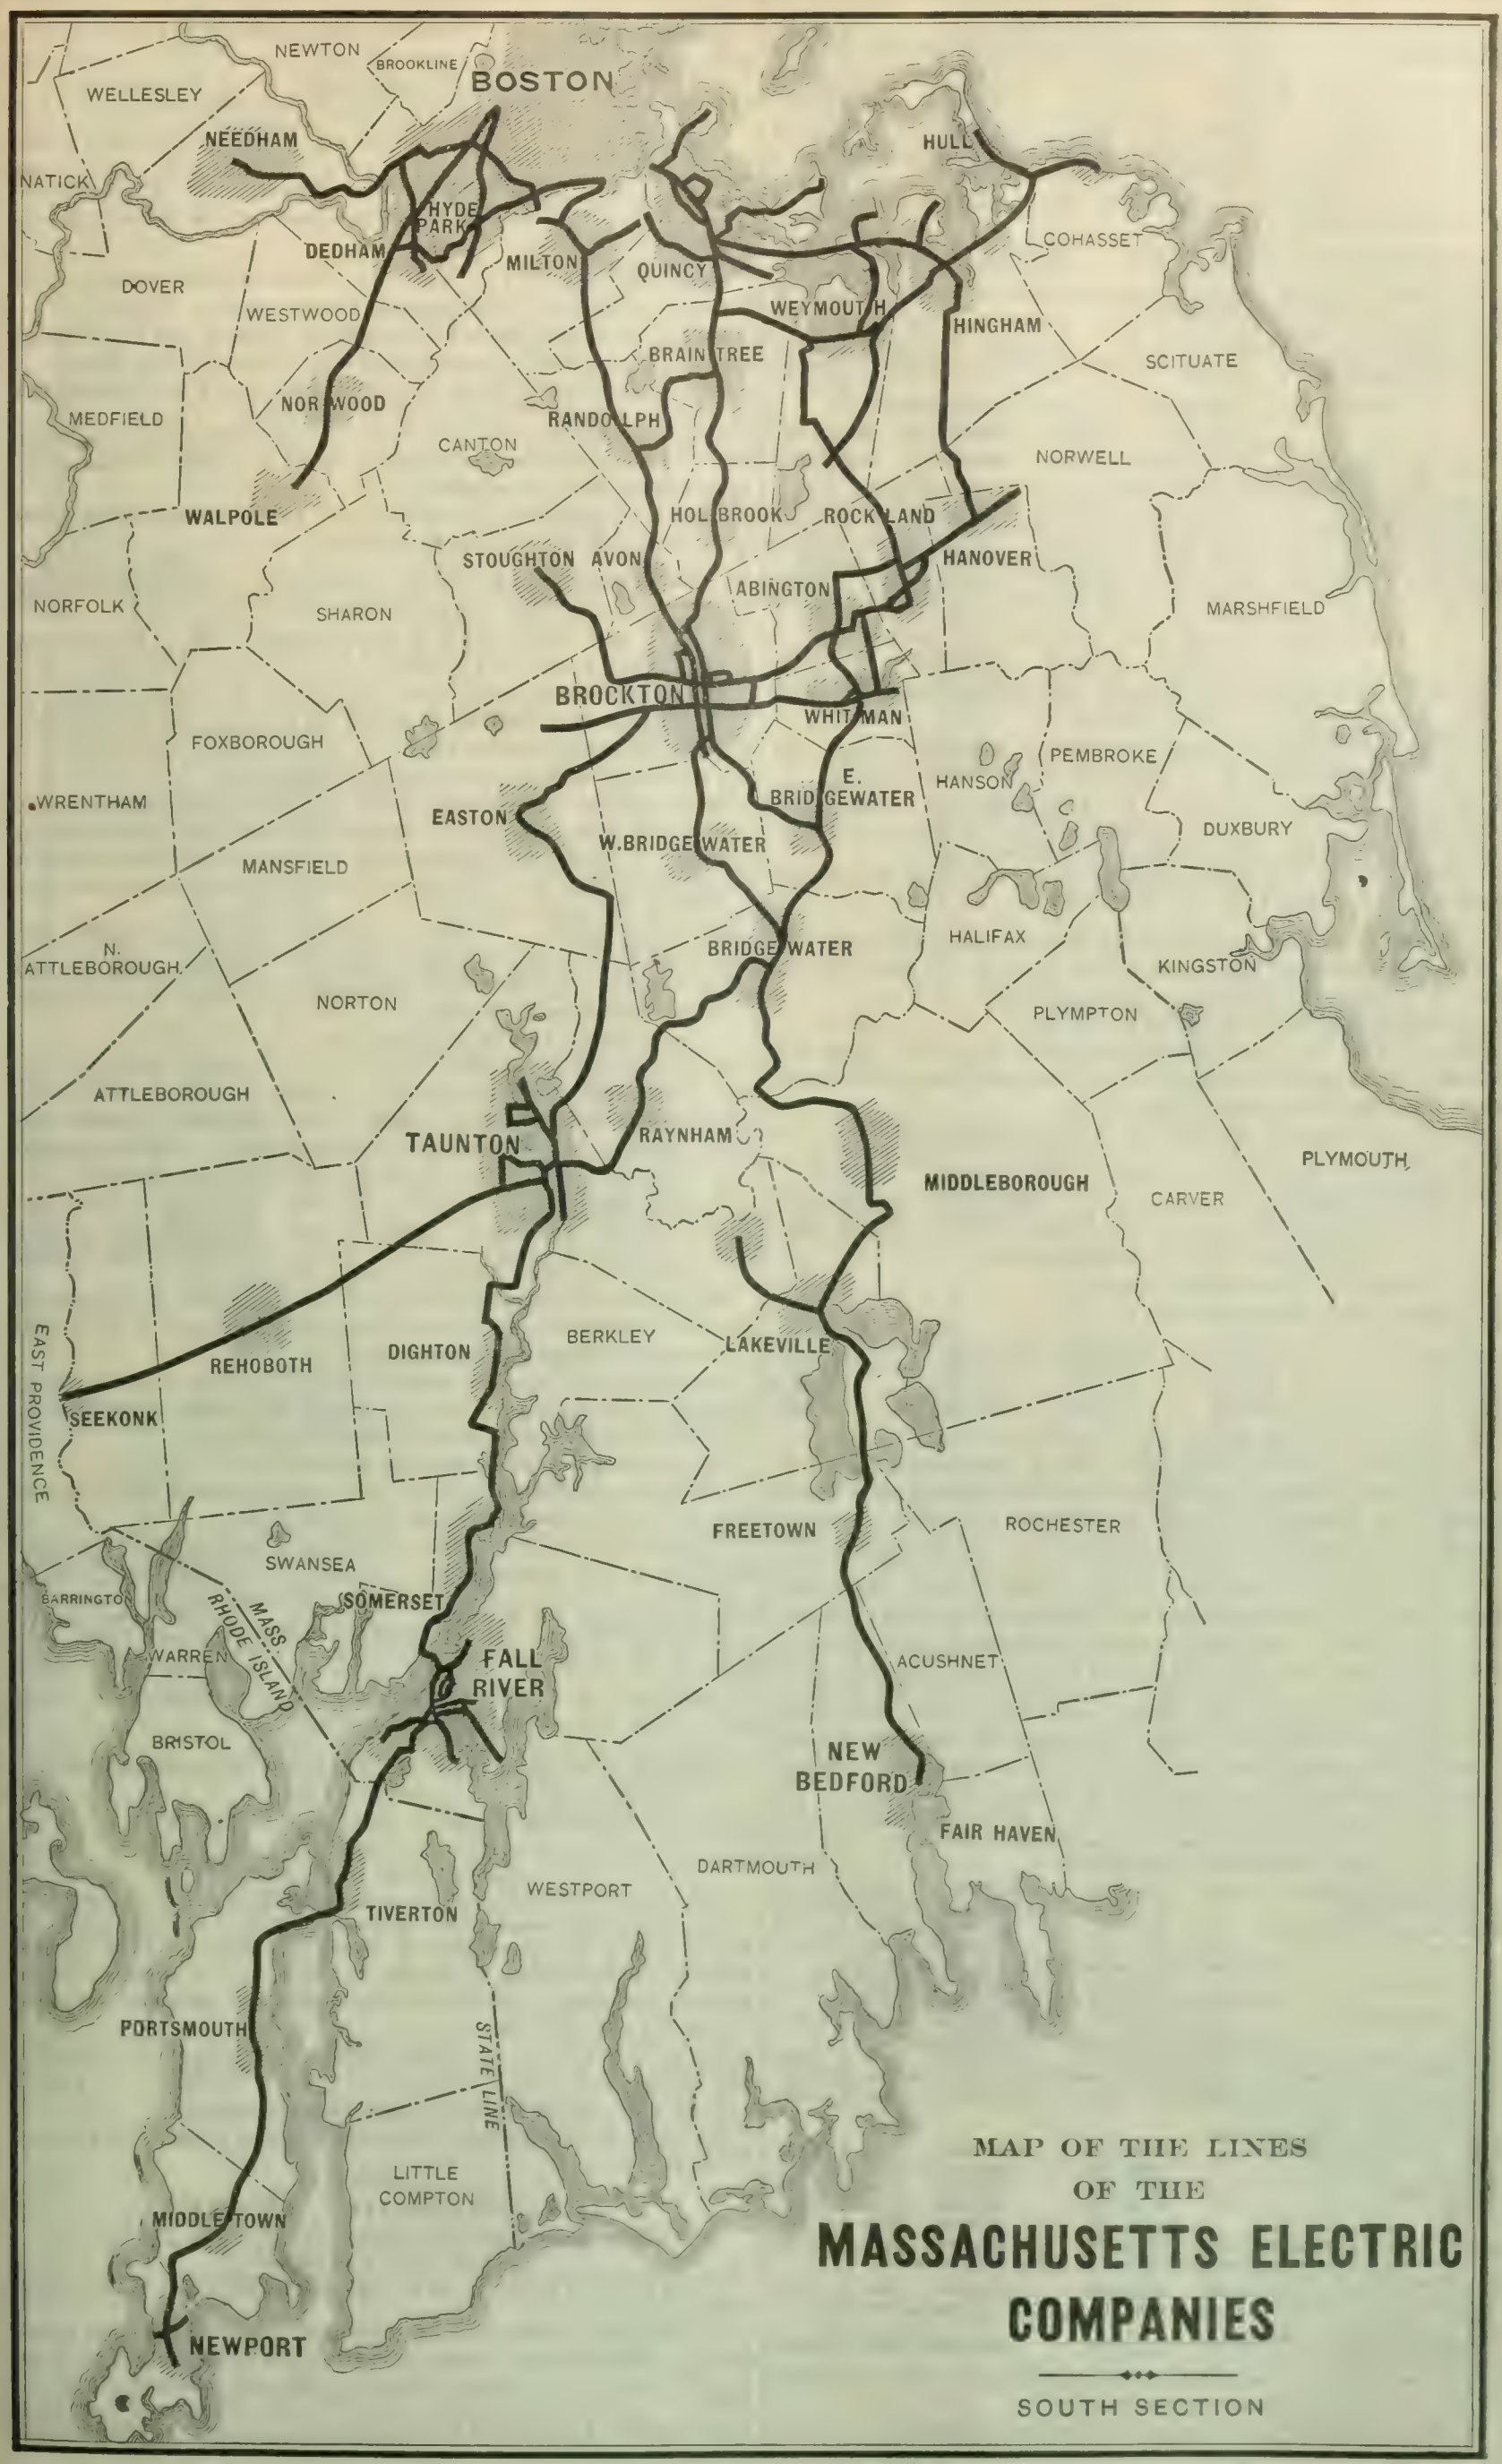
(1) BEVERLY & DANVERS STREET RAILWAY.—Electric. Consolidated with Lynn & Boston April 10, 1901. Stock, $36,000; miles of track, 4·36.



(2) OLD COLONY STREET RAILWAY.—A trolley road.

ORGANIZATION—This was formerly known as the Brockton Street Railway, but on February 15, 1901, name was changed as above. The Brockton Street Railway was a consolidation of the Brockton Street Railway, East Side, Brockton & Holbrook and Whitman street companies. Acquired in 1899 by Massachusetts Electric Companies, and in 1900 was consolidated with the Boston Milton & Brockton, the Brockton Bridgewater & Taunton, the Brockton & East Bridgewater and the Taunton & Brockton. Subsequently was also consolidated with the Quincy & Boston (capital, $767,400) and the New Bedford Middleborough & Brockton (capital, $350,000), the basis of exchange being share for share; in Nov., 1900, was also given authority to issue $363,600 additional stock for floating debt, &c.

In Nov., 1900, Mass. RR. Commissioners approved proposition to purchase the South Shore & Boston and the West Roxbury & Roslindale, and to issue $1,665,000 additional Brockton stock for that purpose. The South Shore & Boston comprised the Braintree & Weymouth Street Railway, the Bridgewater Whitman & Rockland, the Hingham Street Railway (the latter being a consolidation of the Hingham, the Hull and the Nantasket Electric), the Hanover Street Railway and the Rockland & Abington Street Railway. The West Roxbury & Roslindale St. Ry. had previously absorbed the Norfolk Suburban, the Norfolk Central and the Needham & Boston.



In Jan., 1901, also received authority to acquire the Globe St. Ry. (after the Globe St. Ry. had first absorbed the Dighton Somerset & Swansea St. Ry., the Taunton St. Ry. and the Providence & Taunton) by issuing stock, share for share, for the $1,440,000 Globe stock This makes total authorized stock of Old Colony (Old Brockton) St. Ry. $5,781,000.

ORGANIZATION—Incorporated under laws of Massachusetts April 6 1859, and was formerly controlled through ownership of stock by the North Shore Traction Co., which in 1899 was dissolved. Now controlled by Massachusetts Electric Companies. In 1900 absorbed the Gloucester St. Ry. and the Wakefield & Stoneham St. Ry. and increased stock from $1,266,000 to $2,271,000. In June, 1900, petitioned Mass. RR. Commissioners for a further increase of $1,500,000 but in Nov., 1900, Commissioners gave permission to issue only $1,016,000 and fixed price at 130; most of the proceeds will go to fund the $789,000 coupon notes of 1897 and to provide for $161,000 of bonds which matured in May, 1900. See V. 71, p. 964. Total stock was thus made $3,287,000. NOTE.—The $3,111,000 Brooklyn Union "L" bonds were, in April, 1901, sold to a syndicate represented by A. M. Kidder & Co. and Simon Borg & Co.

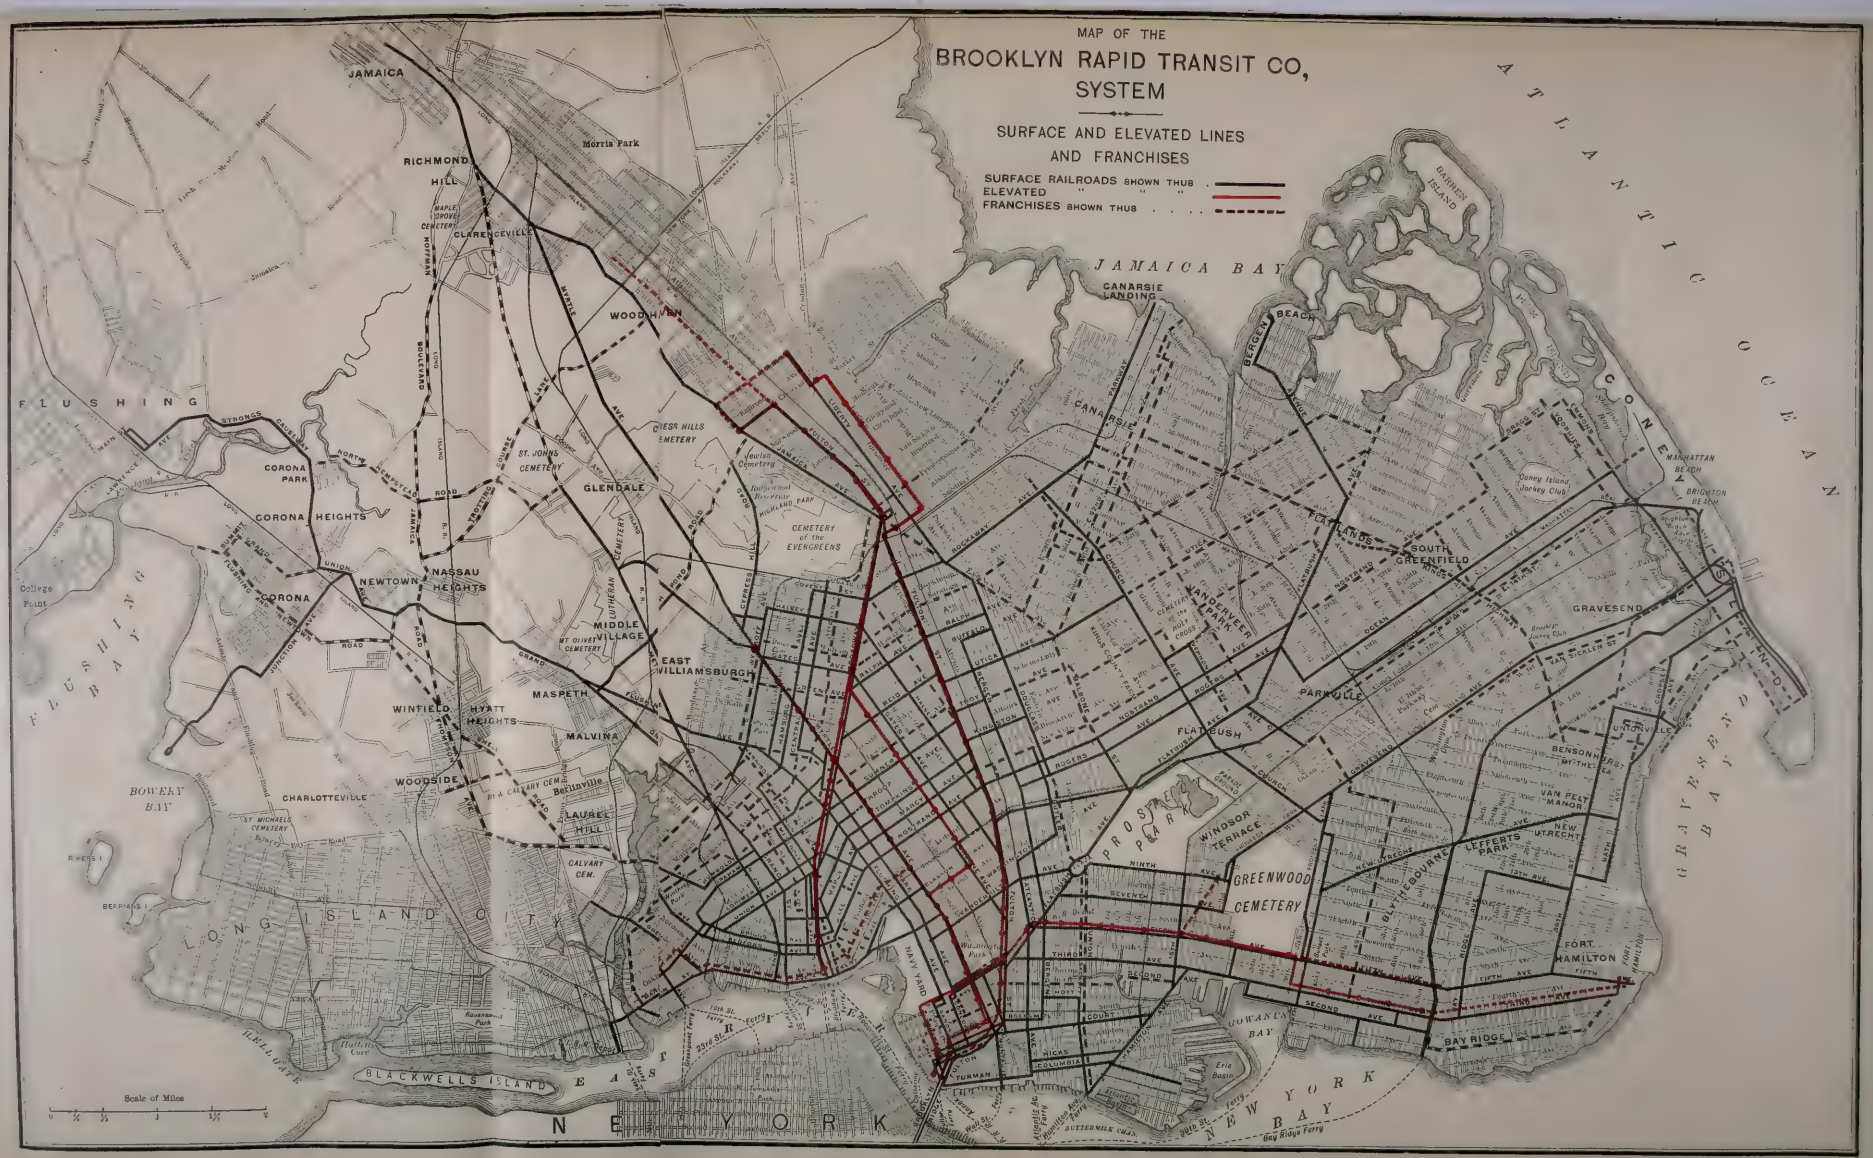
The *Brooklyn City RR. Co.* is held under a 999-year lease, dated Feb. 14, 1893, guaranteeing all fixed charges, organization expenses, taxes and 10 per cent dividend on $12,000,000 of stock. The lease is nominally to the Brooklyn Heights RR. Co. but practically to the Brooklyn Rapid Transit Co., since that company owns the entire capital stock of the Brooklyn Heights Company and guarantees payment of dividends to lessor. In 1898 the Heights Company leased the Brooklyn Queens County & Suburban RR. The lease is renewed every year, rental being fixed charges, taxes and organization expenses. On April 1, 1899, the Heights Company leased the Brooklyn Union Elevated RR. Co.—see terms under the latter—and also on the same date the Nassau Electric RR. See terms under Nassau Electric.

The Brooklyn Rapid Transit Company in April, 1899, also acquired through one of its constituent companies, all the franchises and properties of the former Brooklyn & Brighton Beach RR. Co., and has converted it into an electric road. The company also then leased for the period of 999 years the Prospect Park & Coney Island RR. (see terms under the latter), the New York & Coney Island RR. and the Prospect Park & South Brooklyn RR. In November, 1899, acquired all the stock of the Kings County Elevated Railroad, which has since been consolidated with the Brooklyn Union Elevated.



In April, 1900, the Brooklyn Heights Company began suit against the Brooklyn City RR. to recover about $2,000,000 for failure to fulfill obligations claimed to be imposed by the terms of the lease between the two companies.

ASSETS—The following is a s
ties owned by the Brooklyn Ra

In the reorganization of Long Island Traction the old $30,000,000 stock paid an assessment of $10 per $100 share, the old stock being reduced to $20,000,000, and $7,000,000 of 5 per cent bonds being authorized, against $3,000,000 of Long Island Traction

The Rapid Transit stockholders voted Feb. 11, 1899, to increase the stock from $20,000,000 to $45,000,000.—V. 68, p. 185, 329.

In April, 1899, stockholders were given the privilege of subscribing for new stock to the extent of 7% of their holdings at par.

Bonds—Of the $7,000,000 50-year gold 5s of the Brooklyn Rap.Trans., $1,875,000 took up collateral trust notes, $3,000,000 went to stockholders for the assessment; balance for future requirements of the road. For description of property covered by the mortgage see V. 62, p. 1138. See also application in V. 67, p. 904.

Brooklyn City RR. mortgage of 1891 is for $6,000,000 and is a first lien on the old Brooklyn City road and a consol. lien on the lines acquired by consolidation in 1890. Of the $6,000,000 issued, $4,373,000 are in the hands of the public and the balance is held in the guaranty fund.

The total authorized issue of first consolidated mortgage gold 5s of the Brooklyn Queens County & Suburban RR. is $4,500,000, of which $1,666,000 are reserved for extensions, on which they will be a first lien. Of the $2,834,000 outstanding, $2,255,000 in 1898 were endorsed with the guaranty of the Brooklyn Heights RR. Co. as to principal and interest, and in January, 1899, provision was made for guaranteeing the remainder on the payment of ten dollars per bond Both B. Q. C. & S. loans are subject to call in 1916.

The Sea Beach Ry. 1st 4s also are guaranteed as to principal and interest by the Brooklyn Rapid Transit Co.—V. 65, p. 1219.

The Nassau Electric bonds are guaranteed (by endorsement on each bond) by the Brooklyn Heights RR. Besides covering the mileage directly owned they are a lien by a supplemental agreement upon the stock of the Coney Island & Gravesend Ry. and the Sea Beach Ry. and will become a direct lien on these lines as soon as they have been formally merged in the Nassau Electric. Of the total of $15,000,000 bonds authorized the unissued remainder is reserved for prior liens. See listing application in V. 72, p. 342.

See V. 71, p. 181. Only one fare is charged from 39th Street Ferry or Hamilton Ferry to the Island.

REPORT—The annual report will be found in V. 71, p. 338 and 1267. The method of operation is to have all the railroad companies leased to the Brooklyn Heights Railroad Company, which is the operating company, and the income of the Brooklyn Rapid Transit Company consists of the surplus profits of the Brooklyn Heights Company, and such moneys as it may receive from the stocks and bonds held by it. The table below gives the statement of the Brooklyn Rapid Transit and constituent companies. The operations of the Kings County Elevated for the first quarter of the fiscal year are not included in either year, that company having been operated independently in that period.

CHICAGO GENERAL RY.—An electric road.

ORGANIZATION—Incorporated October 21, 1893, for 50 years. The West & South Towns St. Ry. (formerly leased) was purchased in May, 1896, and consolidated. BONDS ($500 and $1,000 each) authorized $3,000,000, reduced from $10,000,000 in Dec., 1896.—V. 63, p. 1114.

On Sept. 7, 1899, instituted two-cent fares on its branch lines (selling 12 tickets for 25 cents), without transfer, however, to main line.

Dissensions arose between stockholders and holders of floating debt and on April 14, 1900, President J. H. Witbeck filed a bill for the appointment of a receiver, and on the 17th Frank H. Sellers of Chicago was appointed receiver. On Feb. 25, 1901, the Merchants' Loan & Trust Co., trustee of the general mortgage, filed its bill of foreclosure, and on May 23, 1901, the Northern Trust Co., trustee of the West & South Towns bonds, filed its cross bill in the same suit. Frank H. Sellers was appointed receiver under these actions also. A reorganization committee consisting of James P. Black, Lyman M. Paine and Glenn E. Plumb, proposed that bondholders surrender one-half or more of their bonds for cancellation, accepting double the amount in stock. They were asked to deposit their bonds with the Real Estate Trust Co. of New York. Up to June, 1901, no definite progress had been made with the reorganization. A stockholders' committee consisting of Charles L. Bonney (General Counsel of the Company) and Wm A. Goodman and Joseph P. Mahoney, all of Chicago, has also been formed.

The May and November, 1900, and May, 1901, interest on the $1,438,000 of gen. mortgage 5s was defaulted, and the August, 1900, and the February, 1901, interest on the West & South Towns 6s was also defaulted.

CHICAGO UNION TRACTION.—Cable and electric.

ORGANIZATION.—Incorporated in Illinois June 3, 1899, by the Elkins-Widener-Whitney syndicate and purchased for $10,000,000 cash the holdings of stock of Chas. T. Yerkes in the West Chicago and North Chicago roads. These holdings consisted of $3,200,000 West Chicago stock and $2,000,000 North Chicago stock. Subsequently the two systems were leased, the West Chicago for a yearly rental equal to 6 per cent on the stock and the North Chicago for a rental equal to 12 per cent on the stock, the leases being dated June 1, 1899. By a tripartite agreement entered into on the same date the Union Traction Company's holdings of stock of the two roads are to remain in trust with the Illinois Trust & Savings Bank of Chicago "for all time" as security for the leases.—See V. 68, p. 1131.

On April 14, 1900, negotiations for the acquisition of the Chicago Consolidated Traction were consummated. The Union Traction paid $45 in bonds of the Chicago Consolidated Traction bearing 4½ p. c. interest and guaranteed by Union Traction and $1 50 in cash for each share of the Consolidated company's stock. It is understood that $13,500,000 of the total issue of $15,000,000 stock of the Consolidated Traction has been turned over under this plan.—V. 70, p. 791. Company claims a 99-year franchise under the Act of 1865—see V. 72, p. 1137.

STOCK AND BONDS.—The $12,000,000 preferred stock was subscribed for at par, a bonus of 50 per cent, however, being given in common stock.—V. 68, p. 1225. There was thus $2,000,000 cash left after the payment of $10,000,000 to Mr. Yerkes, and this $2,000,000 was spent for improvements and extensions of the lines acquired.

In December, 1899, both issues of stock were listed on the New York Stock Exchange. V. 69, p. 1299.

Paterson Railway.
Saddle River Traction.
White Line Traction, formerly the New Jersey Electric.

All the roads enumerated have been completely merged in the Jersey City Hoboken & Paterson, with the exception of the Paterson Railway and the North Hudson County Railway, and in these two cases practically all the stock has been acquired.

STOCK AND BONDS.—The company made a mortgage for $20,000,000, as described below. Of the new bonds, $10,500,000 are outstanding at the present time. These have been used to acquire the stocks of the various roads absorbed, and to retire the $2,459,375 White Line Traction five per cent ad-interim mortgage. The $404,000 North Hudson County debenture 6s and the $300,000 of Paterson City Railway 2d general 6s are subject to call at any time. The remaining old bonds are not subject to call, but it is expected will be largely retired by voluntary exchange for the new bonds.

INDIANAPOLIS STREET RAILROAD.—A trolley system.

Organization.—Incorporated in Indiana, March 7, 1899. After acquiring the Citizens' Street RR. of Indianapolis and the City Railroad, made a contract with the City of Indianapolis agreeing to surrender the rights and franchises of both companies and accept a new franchise running only thirty-four years. The contract also provides that cash fares are not to exceed five cents, with free transfers, and tickets are to be sold at the rate of six for twenty-five cents and twenty-five for one dollar.

The company also binds itself to pay over to the city (which is to expend it on the public works) the sum of $30,000 yearly, from 1899 to 1925, and $50,000 yearly, from 1926 to 1932, inclusive, the contract expiring in 1933—see V. 68, page 723. The city gets the right to purchase the property "at any time within two years and not later than one year before the expiration of this contract," nothing to be paid for the value of the franchise.

Under the plan of consolidation the stock of the Citizens' RR. was exchanged for Indianapolis Street Ry. securities, but the bonds of the Citizens' RR. remained undisturbed. Citizens' stockholders got a $1,000 4 p. c. gen. mtg. bond of the Indianapolis Street RR. and $200 in Indianapolis Street RR. stock for every 20 shares of Citizens' stock. As to the three-cent-fare case, which the U. S. Court of Appeals decided in favor of the Citizens' Co. in Dec., 1897, see Supplement of Nov., 1898, and V. 64, p. 842, 1180; V. 65, p. 51, 181, 1172.

In October, 1898, P. D. Armour and Norman B. Ream purchased a controlling interest in the stock, and in June, 1899, elected their own board of directors.

In Jan., 1900, parties identified with the Metropolitan Street RR. purchased control of the Kansas City Electric Light Co. and the Edison Electric Light & Power Co., which together do the entire electric lighting and power business of Kansas City.

The controlling spirits in the company have had under consideration a proposition to form a new company (V. 70, p. 1194; V. 71, p. 1220), but scheme has not yet been carried out.

The 10-year notes issued in 1901 were taken by Blair & Co. and proceeds will provide means for carrying on the work of improvements and extensions. V. 71, p. 1311.

FAIR HAVEN & WESTVILLE RR.—A trolley road.

ORGANIZATION—Incorporated June 20, 1860.—V. 64, p. 134. On Nov. 1, 1898, the New Haven Street Railway was purchased for $200,000 stock and $500,000 one-year notes (which were taken up when due), and consolidated with the F. H. & W.—V. 67, p. 843, 955.

In May, 1900, obtained control of the New England St. Ry., acquiring, it is reported, $750,000 of the $1,081,925 stock of the latter company. The New Eng and St. Ry. controls the Winchester Avenue road, with the possession of which the Fair Haven & Westville will control all of the street railway lines in New Haven, as well as an extensive system to surro unding localities. A sale of the New England St. Ry. Co. holdings of stock in the Winchester Avenue was subsequently made at $49 a share to the Fair Haven & Westville, but suit was brought by the late Israel A. Kelsey to compel delivery of the shares to him, claiming to have an option on them. The property was wanted for the A. M. Young syndicate.

METROPOLITAN STREET RAILWAY—

Cable, underground trolley, horse.

ORGANIZATION—Chartered on Nov. 12, 1893, and by consolidation, lease and otherwise has acquired control of practically all the street railways of Manhattan Island except the Manhattan Elevated. The latest acquisition was the purchase and lease in 1900 of the Third Avenue Railroad.

The Metropolitan Street Ry. has absorbed by consolidation the following companies, embracing the "lines owned."

IN 1893—	IN 1894 AND 1895—
Houst. West St. & Pavonia Ferry.	Metropolitan Crosstown.
Chambers St. & Grand St. Ferry.	Lexington Ave. & Pav. Ferry (Cable).
Broadway Railway.	Columbus & 8th Ave. RR. (Cable).
South Ferry RR.	

In addition the companies shown in the table of mileage as "leased etc.," have been acquired from time to time by lease or stock ownership. The latest acquisitions are: In July, 1896, the New York & Harlem RR.; in 1897 the Central Crosstown (including Christopher and 10th Street) and Second Avenue. The miles of track operated has thus been increased as follows: From 80 in 1893 to 131 in 1894, to 140 in 1895, to 172 in 1896, to 212 in 1901. The acquisition in 1900 of the Third Avenue system adds 216 miles more of track, making a grand total of nearly 430 miles of track.

The Elm Street Connecting Railway Co. was incorporated in May, 1900, in the interest of the Metropolitan Street Ry. to build a line on Elm St. from Centre St. to Great Jones St. and through Lafayette Place, a distance of 6,000 feet, as a short route for the 4th Avenue line.

In March, 1900 (V. 70, p. 584), purchased in the open market a controlling interest in the Third Avenue Railroad and in April, 1900, took

a lease of the same. In July, 1900, built a strip of road across Manhattan Street, connecting the Metropolitan system with the Third Ave., and began running cars through from the Battery to Fort George.

New Electric Lines.—The company in Feb., 1901, was using its underground electric system on Eighth Ave. line from 158th St. to Battery Place; over the entire Fourth Avenue line; over the greater portion of the Second Ave. line,; over the 23d Street line and over the Sixth Ave. line via 59th Street and Amsterdam Ave., and over the branch of the Third Avenue Railroad to Fort George. The Broadway cable also is being prepared for operation with the same motive power.—V. 66, p. 337, 520, 616; V. 67, p. 530, 736, 956.

In August, 1899, began to operate the Twenty-eighth Street and Twenty-ninth Street lines exclusively with air-power cars. In July, 1900, began operating cars by the electric storage battery system on the 34th Street Cross-Town line.

For decision in New York Supreme Court adverse to the validity of the franchise, under which the Lexington Ave. extension of the Houston West Street & Pavonia Ferry RR. and also the line across 116th Street was built, see V. 72, p. 45.

As to the relative earning capacity of the horse, cable and underground electric lines of the system see President Vreeland's statement in V. 67, p. 956; also V. 69, p. 489.

The New York Gas & Electric Light, Heat & Power Co., incorporated in Nov., 1898, with capital of $25,000,000, will distribute to the public, together with its own current, the surplus current of the Metropolitan St. Ry.—V. 67, p. 1263. The Metropolitan St. Ry. is largely interested in the International and American Air Power Co.—V. 68, p. 130. In November, 1899, President Vreeland was quoted as saying that the American Air Power Co, to the presidency of which he had just been elected, and which operates the compressed-air cars run over the cross-town lines, had been "practically under the control of that company since its formation." V. 69, p. 1060.

THIRD AVENUE RAILROAD—Underground trolley.

ORGANIZATION.—Chartered Oct. 8, 1853. A cable road from Dec. 5, 1893, but in 1899 changed to underground trolley—the 125th Street line Sept. 29, 1899, the Third Avenue line above 65th Street Oct. 22, 1899, and the Third Avenue line below 65th Street on Nov. 19, 1899. In Jan., 1900, the electric line between 125th and 162d streets was completed. In Nov., 1895, purchased control of the 42d Street Manhattanville & St. Nicholas Ave. line. See V. 61, p. 872, 926. Control of Dry Dock E. B. & B. was obtained Aug. 23, 1897. (V. 65, p. 194). In January, 1898, a majority of the stock of Union Ry., N. Y., was purchased.—V. 66, p. 135. In Sept., 1898, Union Ry. purchased Yonkers RR. V. 67, p. 635. In April, 1899, the Tarrytown White Plains & Mamaroneck Ry. was acquired.—V. 68, p. 674.

A traffic agreement, which went into effect April 29, 1899, has been entered into between the Manhattan Elevated and the Third Avenue Railroad system [comprising the Third Avenue RR., the Dry Dock East Broadway & Battery, the 42d St., Manhattanville & St. Nicholas Avenue RR. and the Union Railway lines], providing for an extensive scheme of transfers at cross-town junctions, and also at the terminal points of the two systems. The transfers are granted for an additional fare of 3 cents, making the cost of the entire journey 8 cents. For the latter sum a passenger can thus ride from the City Hall and South Ferry to Yonkers, New Rochelle and Mt. Vernon.—V. 68, p. 672, 872.

Owing to failure of negotiations for a new loan to take care of a large floating debt which had accumulated and to provide means for pressing needs, the Third Avenue Railroad was on Feb. 28, 1900, placed in the hands of Hugh J. Grant as receiver. On March 19, 1900, it was announced that the Metropolitan Street Railway had purchased control of the road in the open market and would provide for the rehabilitation of the company. Arrangements were at once concluded through a syndicate, represented by Kuhn, Loeb & Co., for the sale of $35,000,000 of the $50,000,000 new mortgage described below, and on May 24 the property was restored to the company, passing into the possession of the Metropolitan Street Railway Company as owners. Kuhn, Loeb & Co. offered a block of the bonds for sale in Dec., 1900.—V. 71, p. 1168.

Lease.—On April 13, 1900, the Metropolitan Street Railway Company took a lease of the property for 999 years. Formal possession was taken May 24, 1900. For the first four years Third Avenue stock will receive only the net income above expenses and fixed charges; the next two years 5 per cent is to be paid on the stock; the succeeding four years 6 per cent; thereafter 7 per cent.

ORGANIZATION—Consolidated with United Traction in June, 1897, which purchased all, or nearly all, the capital stock (V. 65, p. 27).

CONSOLIDATED TRACTION—Trolley road.

The merging of the United Traction with the Consolidated Traction and the Monongahela Street Railway under the name of the Union Traction has been delayed by litigation. Consolidated Traction stockholders voted June 20, 1900, to lease the property to the Union Traction Co. as soon as the $30,000,000 stock of the latter company had been subscribed for and $6,000,000 in cash paid in. Under the lease (which is to be for 999 years) 6 per cent is to be paid on the preferred stock of the Consolidated Traction; on the common 2 per cent for two years, then 3 per cent for three years, then 3½ per cent for two years, and thereafter 4 per cent. See V. 70, p. 995. In July the directors voted to postpone execution of lease until the suits brought by minority stockholders are disposed of. In Dec., 1900, litigation was amicably settled, but in Feb., 1901, negotiations for merger were still pending.

ORGANIZATION—Chartered July 15, 1895. The company has merged the Fort Pitt Traction. Co. and assumed its leases of the Citizens' and the Allegheny Traction companies, and has acquired the control of the Central Pittsburg and Duquesne Traction companies. On April 2, 1896, assumed management of these six companies, with capital of $13,500,000 and a bonded debt of about $6,377,000. See V. 62, p. 1087.

The preferred stock carries cumulative dividends of 6 per cent per annum, and has the right to participate equally with the common stock when that has received 6 per cent. First dividend on preferred was paid May, 1897. In November, 1897, no dividend was paid. See V. 65, p. 685. In May and Nov., 1898, 3 p. c. was paid. In May, '99, 3 p. c.; Nov., '99, 3 p. c. The St. Louis & Suburban system alone of the street car lines in St. Louis has not been acquired; $3,000,000 of the new 4s, however, will be reserved for the sole purpose of retiring its bonds in case its purchase should at any time be thought desirable. The 4 per cent loan is secured by all the stocks of the constituent companies, or by direct mortgage lien upon their property and franchises in so far as purchased.

The new mortgage bears date Sept. 20, 1899, and the bonds mature July 1, 1934, with interest payable January and July at the St. Louis Trust Company, Trustee. Bonds are for $1,000 each and coupon, with privilege of registration of principal. They cannot be called. Messrs. Brown Bros. & Co. offered the bonds for sale in Feb., 1900.

Lease Guaranty.—The St. Louis Transit Co., besides leasing all the lines of railway of the United Railways Co. of St. Louis, guarantees the payment of interest upon all the new 4s as well as on the bonds of the constituent companies, and also 5 per cent, payable semi-annually, upon the preferred stock of the United Company.

Exchange of Stock.—The St. Louis Transit Co. has exchanged its stock (172,613 shares) for the common stock of the United Railways Company of St. Louis, share for share, in consideration of a payment to it by the stockholders of the United Railways Co. of $11 per share. This furnished the Transit Co. a cash capital of $1,898,743 free from all obligations except those under its lease.

ABBREVIATIONS, ETC.

The terms and abbreviations employed in this SUPPLEMENT are explained in the following :

"STOCK & BONDS"—Under these words are shown—

"STOCK"—The amount of stock *authorized* immediately follows the word "stock", and against this is the par value of single shares, viz : "Stock, $200,000—$100", means stock, total issue authorized by charter or by act of legislature, $200,000, divided into shares of $100 each; "f. p." following the amount given as outstanding means "full paid."

"Pref." means "preferred stock." "Pref. 6 p. c. cum." means preferred stock entitled to dividends of 6 per cent per annum, such dividends if not paid accumulating, all dividends due and unpaid to be paid in full for each and every year before the common stock receives anything "Pref. 6 p. c. *non*-cum." means simply that the stock is entitled to 6 per cent per annum if earned, but that if unearned in any year the dividend for that year will not be paid subsequently.

"BONDS"—"Mort." or "M." means mortgage. "Consol." or "con. M." means consolidated mortgage. "Gen. M." means general mortgage. The amount next following is the total authorized amount that can be issued under the mortgage. The word "gold" is usually spelled out, but in some instances is contracted to "g," while "cur." means currency.

"Conv." means convertible into stock. "S. f." means sinking fund. "c." means coupon; "c.*" means coupon but may be registered as to principal; and "c.*&r." means that registered certificates without coupons as well as coupon bonds are outstanding. The letters "p. m." mean per mile, so $15,000 p. m. means that the issue of bonds is restricted to $15,000 for each mile of track. "Guar." means guaranteed, and "guar. p. & i. (end.)" means guaranteed as to principal and interest, the guaranty being endorsed on each bond.

"DATE"—The date of issue on the face of the bonds is indicated under the word "date."

"INTEREST"—Under this heading is given the rate per cent yearly of the interest payable on the bonds or (if guaranteed) of the dividend payable on the stock; also the months when the interest or dividend is payable, thus, "6 J - J" means 6 per cent per annum payable January and July; correspondingly, "F - A" is used to mean February and August; "M - S" means March and September, and so on, while "Q - J" means quarterly beginning in January and "Q - F" quarterly beginning in February. [The day when the interest payment is due can generally be determined by noticing when the loans mature, the day of the month there given being in most cases the same as for one of the interest dates.]

"ROAD"—The word "track" means in Street Railway parlance all track, whether main line, siding, switch or second track. "Rails are 80-lb. girder" means that each rail weighs 80 pounds to the yard.

REVIEW OF DECEMBER.

All the characteristics which became manifest in November as the result of the election were continued through December. On the Stock Exchange the era of speculation and higher prices inaugurated by that important event developed into a feeling of unrestrained buoyancy under which prices mounted up in a way that has seldom if ever been equaled, and buying was conducted with a degree of confidence eclipsing all previous similar movements.

Aside from the direct influence of the election in encouraging both investment and speculative purchases of stocks and bonds, there were important auxiliary aids which contributed to the same end. No feature was more conspicuous during December than the prominence of reports and rumors regarding intended combinations or plans for insuring greater harmony among competing interests. As regards many of these nothing tangible developed which could be accepted as throwing much light on the purposes of insiders, but at least one scheme of large magnitude and far-reaching importance was carried through. We refer to the purchase by J. P. Morgan & Co., of the Pennsylvania Coal Company. This transaction effected an entire change in the anthracite situation, completely upsetting the plans of the independent operators, and removing the possibility of the construction of a new line to tidewater in hands antagonistic to the existing roads. It was one of those bold moves for which Mr. Morgan has become so famous, and it came very suddenly, too. The Pennsylvania Coal Company was the most influential party back of the proposition to build a new line. With the support of that company withdrawn, or if continued extended by hands friendly to the older roads, all danger from that source at once passed away. It should be added that prior to this acquisition of the Pennsylvania Coal Company a serious blow had been dealt the projected road in the purchase by the New York Ontario & Western of coal lands, the product from the mines of which was to be shipped over the new road. It remained for Mr. Morgan, however, to completely upset the schemes of the independent operators.

Besides avoiding threatened opposition by hostile interests, the purchase was also important in another sense. It will permit the carrying out of arrangements for harmonizing the anthracite situation.

With all the various roads working together in a friendly way, profits from the anthracite business will not be jeopardized as in the past, and it will be possible to earn fair profits. The advance in wages granted at the time of the miners' strike must of course find compensation in some way. No doubt it will be possible to maintain a slight advance in the price of coal, the public having become accustomed to a higher price since the strike and raising no objection to it because understanding its necessity. No doubt also the absence of friction among the several lines will tend to greater economies in operation, allowing a saving in that way, too. When all this is borne in mind it will be understood why the Erie issues, the Reading stocks, and in fact the securities of all the anthracite properties have responded to Mr. Morgan's action with such a large advance in prices, and the whole market has followed in the wake of these leaders.

The great rise in December, added to the no less striking rise in November, makes the price changes for the year among the most noteworthy on record. Broadly speaking, practically the whole of the improvement in values was established in the last three months. There are a few stocks, however, which by reason of special favoring conditions, or because reorganization had placed them in a greatly improved condition, which had not yet been reflected in their prices, may be said to have advanced throughout the year. As early as February the market began to show weakness, the special depressing cause then being the collapse in the stock of the Third Avenue Railroad. In March came the only decided upward movement of the year outside of that in the last three months. The passage of the Gold Standard Law was the occasion for the rise at that time; but in April the American Steel & Wire episode again reversed the course of the market. The reaction in commodity prices following upon that event, together with the check to advancing trade activity occasioned by the Presidential canvass, kept the market in a weak or sagging state most of the time until the following October. The industrial properties suffered particularly in the downward movement, the railroad shares throughout the whole of the period of depression holding up quite well, though they did not escape declines. The downward movement culminated in September with the breaking out of the anthracite coal miners' strike. Mr. McKinley's re-election began to be discounted in October, and from then until the very end of the year the upward movement continued in full swing.

In the majority of cases the lowest points of the year were toucned in the period from June to September—in many cases in the last-mentioned month. In some instances, however, for the reason already stated, the prices made in the early months were the lowest, the stocks advancing almost continuously. Atchison common, which touched 48¾ in December, sold at 18⅝ in January; Norfolk & Western, which sold at 45¾ in December, sold at 22⅝ in January; Lake Erie & Western common rose from 20⅛ in March to 52 in December; Denver & Rio Grande common from 16⅞ in January to 34½ in December; Union Pacific common from 44⅜ in January to 81⅜ in December; Missouri Pacific from 38⅜ in January to 72½ in December; and Central of New Jersey from 115 in January to 150½ in December. Milwaukee & St. Paul common was at its lowest in June, namely 108½, from which it advanced to 148¼ in December; Big Four stock advanced from 55 in June to 76 in December; Erie 1st preferred (on the Pennsylvania Coal purchase) sold up to 63½ in December, against 30⅜ only three months before in September; Northern Pacific common rose from 45¾ in September to 86½ in December, Great Northern from 144¾ in June to 191½ in December, New York Central from 125⅝ in June to 145⅝ in December, Pennsylvania from 124⅜ in September to 149¼ in December, etc., etc. In the industrials American Sugar common against 95¼ in March sold at 149 in December, and General Electric from 120 in January sold up to 200 in December. Many of the industrial properties, however, in the rise of the last three months did not recover to the prices touched by them before the break in April.

Owing to the inactivity during the summer months, the share sales for the year did not reach the aggregate recorded in 1900, the comparison being 138,380,184 shares, against 176,421,135 shares.

The foreign exchange market was weak the first ten days, but subsequently advanced, influenced by the continued sales of stocks here on foreign account and dear money at the European centres.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1900. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Prices about January 2, 1900*," were made on that date except those in italics, which are the nearest in January, 1900.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of December*. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given* The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

☞ We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation.

REVIEW OF JANUARY.

The great speculation arising out of the defeat of Bryanism which distinguished the closing months of 1900 attained a still greater height in the early part of January, new records being made for activity and strength. The movement, however, culminated for the time being in these extraordinary transactions. Subsequently considerable irregularity developed, and a more or less general reaction in prices ensued; at the same time the volume of business, as would be expected, also fell off. The inherent strength existing was shown in the fact that this reactionary tendency did not prevent extensive movements in special stocks, in some of which dealings were continued on an enormous scale. In such stocks further large advances in prices were established, notwithstanding the decline in the general market.

Passing in review the events of the month of most importance, we may note (1) the purchase by Mr. J. P. Morgan of a controlling interest in the Central Railroad of New Jersey and the tender of the same to, and its acceptance by, the Reading Company; (2) the prevalence of rumors of other purchases, combinations and consolidations, the most of these rumors resting on a very slender foundation, or having no basis at all; (3) the development of considerable friction among large rival industrial corporations in the steel trade; (4) the rather unexpected advance at the beginning of the month in the Bank of England rate of discount after a rise the previous month had been avoided; (5) the resumption of gold exports to Europe; (6) the sudden sickness and quick death of Queen Victoria, who had sat upon the English throne so long.

The purchase of the Central of New Jersey by Mr. J. P. Morgan was the greatest stimulating influence upon speculation. Following so quickly upon the purchase of the Pennsylvania Coal Company, it was accepted as meaning the complete harmonizing and solidification of the anthracite coal interests, and a state of great excitement ensued. The announcement came on Saturday January 5. Events had been gradually leading up to a climax. Rumors of all sorts of combinations among the railroads in various parts of the country were afloat, the foremost of these being the quite positive declarations that the Great Northern, the Northern Pacific and the Chicago Milwaukee & St. Paul were about to be united

in some way. Nothing tangible grew out of these rumors, but Mr. Morgan's achievements had put the public in a frame of mind where such stories found ready acceptance. As a result, Milwaukee & St. Paul common on Friday the 4th suddenly moved up from 145 to 158½ and the next day got as high as 162. Dealings in all the active properties were on an enormous scale, and sales on the Stock Exchange on this Friday reached 1,808,413 shares, far exceeding the largest previous day's business up to that time in the history of the Exchange; but a still higher total was to be attained.

It was under such surroundings that the announcement of the purchase of the Central of New Jersey was made the next day, Saturday the 5th. As a consequence speculation ran wild, and the price fluctuations were exceedingly wide. The sales for the two hours (Saturday being a half holiday) amounted to 1,152,793 shares, a total which had not even been approached on any previous Saturday half-day. The following Monday, the 7th, proved even more active. On that day the recorded transactions actually passed the two-million mark, the sales reaching the phenomenal total of 2,127,503 shares. The changes in prices were on a par with the magnitude of the dealings.

This proved the turning point. On Tuesday the 8th the sales were 1,452,602 shares and on Wednesday the 9th 1,670,882 shares, but thereafter for the rest of the month they never got much above a million shares on any day, and frequently dropped far below that amount. Business was not only less active, but was at a lower level of prices, the fluctuations being extremely erratic, the high figures reached when the speculation was at its height being in some instances left far behind. Milwaukee & St. Paul common was a sort of pivotal stock. It touched 162 on the 5th and again on the 7th; by the 21st it was down to 142½; the close on the 31st was at 151½. There were some favorable developments, such as the increase in the dividend on Louisville & Nashville stock from 4 per cent per annum to 5 per cent, and in that on Delaware & Hudson stock from 5 to 7 per cent. Such incidents were often attended by sharp upward spurts in the stocks affected, Delaware & Hudson stock, for example, rising on Friday the 11th (when the dividend was enlarged) from 146 to 159½. The course of the general market, however, remained irregular, days of great strength being interspersed with days of great weakness.

The downward reaction was occasioned by the fact that so many of the rumored deals had failed of accomplishment, by the development of weakness among the shares of the iron and steel properties, and also it is believed by a change of position from the bull side to the bear side on the part of some leading operators. The weakness in the iron and steel shares was due mainly to the announcement by President Schwab of the Carnegie Company that the latter intended to erect a large plant at Conneaut, on Lake Erie, for the manufacture of merchant pipe. This step would mean direct competition with the line of goods made by the National Tube Company, and accordingly the common stock of the latter sold down to 53½ on the 14th, against 70 on the 2d. Federal Steel and American Steel & Wire shares were no less affected. Considerable recovery subsequently ensued when reflection showed that it would take about two years before the competition threatened could become effective, and that in the meantime the rival interests might come together and avoid trouble; indeed, there were rumors that negotiations were on foot to bring about immediate peace.

The illness and death of Queen Victoria did not actually prove a disturbing factor in the market; but it came at a time when the market was in a state of reaction, and naturally it did not prove a steadying influence. The latter part of the month the tone of the market was again strong, influenced by an active speculation at higher prices in the Gould shares and other Southwestern properties, namely Missouri Pacific, St. Louis Southwestern, Missouri Kansas & Texas, the Wabashes, Texas Pacific, etc. The share sales for the month were 30,285,055 shares, which compares with 24,251,983 shares in January 1899, the previous largest monthly total on record.

In the money market very easy conditions developed. The return flow of currency from the interior was on a large scale, and at the same time U. S. Treasury disbursements were in excess of receipts. Under such circumstances the exports of gold had no effect in checking the downward course of money rates.

With money here steadily growing easier, and money abroad firm, our exchange market naturally showed great strength, and exports of gold ensued. The Bank of England minimum was advanced from 4 to 5 per cent on the 3d of the month. The first shipment of gold was made on Thursday, the 17th, and further amounts went on the two succeeding Thursdays. The gold all went to Paris.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1900. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. The black-faced letters in the column headed "Interest Period" indicate in each case the month when the bonds mature.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*
